IRIS SFP Product Family

As Angora Networks, we prevent connection problems in your network with our SFP modules that we produce with the highest quality electronic components. Our IRIS product family, where we offer all options according to infrastructure type and speed requirements, ensures that your network operates uninterruptedly and with high performance.

As part of our commitment to robust and constantly working products, the IRIS SFP family of SFP (Small Form-factor Pluggable) converters, as the most important components, prepare your physical infrastructure to connect your active devices and form your vital circulation system.

At Angora Networks, we work with top-of-the-line manufacturing facilities to manufacture our own converters to the highest quality possible. Our optical and copper modules can be used together in all Verge models according to your bandwidth needs. From 1G copper to 100G QSFP28 modules, compatible with any brand, Iris SFP converters are ready for your network.

COMPATIBLE WITH KNOWN BRANDS

It works seamlessly and in harmony with the brands commonly used in Turkey.

HOT PLUGGABLE

Hot swapping can be changed or added without stopping, shutting down, or restarting the system.

ALL METAL HOUSING

All-metal and solid construction.

ROHS COMPLIANT

All IRIS SFP models are RoHS compliant. No dangerous substances are used in its content.

Speed	Connection Type
1G/2.5G SFP	Copper, Fiber (SX,LX,EX,ZX)
10G SFP+	Copper, Fiber (SR,LR,ER,ZR), Direct Connect (DAC)
25G SFP28	Fiber, Direct Connect (DAC)
40G QSFP+	Fiber, Active Optical Cable (AOC), Split (Breakout)
100G QSFP28	Fiber, Active Optical Cable (AOC), Split (Breakout)
400G QSFP28-DD	Fiber, Active Optical Cable (AOC), Split (Breakout)
